Dear Mr Ford,

**Certification of Structural Check: DPR Span Tables**

As requested I have checked your DPR span tables in order to determine whether structures designed using the tables will be in accordance with relevant Australian building codes.

In my opinion structures designed and constructed in accordance with the Tables and good building practice will perform in accordance with the requirements of the Building Code of Australia and will be capable of carrying the loads specified in Australian Standards 1170 Part 1: *Dead and live loads and load combinations*, 1170 Part 2: *Wind loads* and 4055 *Wind loads for housing*.

Please contact me if you wish to discuss these matters further.

Yours Faithfully
